

# Table of Contents

PREFACE . . . . .	xi
-------------------	----

## THE BASICS

<b>1</b> DESCRIPTIVE STATISTICS . . . . .	3
Understanding Variables . . . . .	3
Summarizing the Data Collected in a Study . . . . .	6
Interpreting Normal and Standard Normal Distributions . . . . .	9
Reading Tables and Figures . . . . .	12
Self-Study Questions . . . . .	14
<b>2</b> ASSESSING RATES AND RISKS . . . . .	15
Assessing Rates . . . . .	15
Vital Statistic Rates . . . . .	16
Raw (Crude) Versus Adjusted Rates . . . . .	17
Assessing Risks . . . . .	20
Self-Study Questions . . . . .	31

## STATISTICAL INFERENCE AND BETWEEN GROUP COMPARISONS

<b>3</b> PROBABILITY AND STATISTICAL INFERENCE . . . . .	37
Probability Concepts and Basic Rules . . . . .	37
Population Parameters and Sample Statistics . . . . .	40
Theoretical Probability Distributions . . . . .	42
Sampling Distributions . . . . .	46
Making Inferences Concerning the Population Mean . . . . .	48
Final Thoughts . . . . .	57
Self-Study Questions . . . . .	58

<b>4</b>	<b>T-TESTS AND ANALYSIS OF VARIANCE . . . . .</b>	<b>63</b>
	T-Tests. . . . .	63
	1-Sample T-Tests. . . . .	64
	Paired T-Tests. . . . .	64
	Independent Groups T-Tests. . . . .	65
	T-Test Recap. . . . .	66
	Multiple Comparisons and Alpha Error. . . . .	68
	ANOVA. . . . .	70
	One-Way Analysis of Variance (1-Way ANOVA). . . . .	70
	Factorial ANOVA . . . . .	76
	Repeated Measures ANOVA. . . . .	81
	Assumptions of ANOVA . . . . .	82
	Examples from the Literature . . . . .	83
	Self-Study Questions . . . . .	88
	References . . . . .	91
<b>5</b>	<b>ORDINAL OUTCOME VARIABLES . . . . .</b>	<b>93</b>
	One Sample Assessed One Time: Sign Test. . . . .	94
	One Sample Assessed Two Times: Wilcoxon Signed Rank Test . . . . .	94
	Two Samples Assessed One Time: Wilcoxon Rank Sum Test (AKA Mann Whitney U Test) . . . . .	97
	More Complex Designs . . . . .	99
	Examples from the Literature . . . . .	99
	Self-Study Questions . . . . .	102
	References . . . . .	103
<b>6</b>	<b>NOMINAL OUTCOME VARIABLES . . . . .</b>	<b>105</b>
	One Sample Assessed One Time: Binomial Test or Z Approximation . . . . .	105
	Assessing Change Over Time: McNemar Test . . . . .	107
	Two Samples Assessed One Time: Chi-Square, Fisher's Exact, and Z Approximation Tests. . . . .	108
	Examples from the Literature . . . . .	112
	Self-Study Questions . . . . .	118
	References . . . . .	119

## CORRELATION AND REGRESSION

<b>7</b>	<b>CORRELATION AND LINEAR REGRESSION . . . . .</b>	<b>123</b>
	Bivariate Correlations . . . . .	123
	Pearson Correlation Coefficient. . . . .	123
	Spearman Correlation Coefficient . . . . .	126
	Linear Regression Analysis . . . . .	126
	Multiple Linear Regression . . . . .	129
	Model Building . . . . .	131
	Summary of Important Points. . . . .	132
	Extensions of the Linear Model . . . . .	134
	Examples From the Literature. . . . .	135
	Self-Study Questions . . . . .	142
	References . . . . .	144

<b>8</b>	<b>LOGISTIC REGRESSION . . . . .</b>	<b>145</b>
	Comparison of the Linear and Logistic Models. . . . .	145
	Interpreting Logistic Regression Findings . . . . .	147
	Model Building and Evaluating Model Fit . . . . .	150
	Examples from the Literature . . . . .	151
	Self-Study Questions . . . . .	156
	References . . . . .	158
<b>9</b>	<b>SURVIVAL ANALYSIS . . . . .</b>	<b>159</b>
	Analytic Challenges. . . . .	159
	Life Table Analysis . . . . .	161
	Comparing Survival Curves . . . . .	162
	Hazard Ratio . . . . .	162
	Kaplan–Meier Method and Cox Proportional Hazards Model . . . . .	164
	Assumptions of Survival Analysis . . . . .	167
	Clinical Trial Examples . . . . .	168
	Self-Study Questions . . . . .	172
	References . . . . .	173

## FINISHING TOUCHES

<b>10</b>	<b>ASSESSING STUDY MEASURES. . . . .</b>	<b>177</b>
	Assessing Reliability. . . . .	178
	Internal Consistency Reliability . . . . .	179
	Test–Retest Reliability . . . . .	179
	Interrater Reliability . . . . .	179
	Assessing Validity . . . . .	181
	Assessing Responsiveness. . . . .	183
	Measurement Properties of Diagnostic Tests. . . . .	183
	Sensitivity . . . . .	184
	Specificity. . . . .	184
	Clinical Inferences Based on Test Results . . . . .	184
	PPV . . . . .	185
	NPV. . . . .	185
	Effect of Prevalence on PPV and NPV . . . . .	185
	Accuracy . . . . .	187
	Likelihood Ratios . . . . .	187
	Effect of Different Cutoff Points on Sensitivity and Specificity . . . . .	188
	Receiver Operating Characteristic Curves. . . . .	189
	Self-Study Questions . . . . .	190
<b>11</b>	<b>ASSESSING EQUIVALENCE AND NONINFERIORITY. . . . .</b>	<b>193</b>
	Traditional Approach: Demonstrating Superiority. . . . .	193
	Demonstrating Noninferiority . . . . .	194
	Demonstrating Equivalence. . . . .	196
	Important Considerations . . . . .	197
	Example from the Literature. . . . .	199

	Self-Study Questions . . . . .	199
	References . . . . .	200
<b>12</b>	<b>META-ANALYSIS . . . . .</b>	<b>201</b>
	Characteristics of a Systematic Review . . . . .	201
	Meta-Analysis . . . . .	202
	Example from the Literature . . . . .	207
	Self-Study Questions . . . . .	208
	References . . . . .	209
	<b>APPENDICES . . . . .</b>	<b>211</b>
	A Summary of Statistical Tests . . . . .	211
	B Answers to Exercises and Self-Study Questions . . . . .	212
	<b>INDEX. . . . .</b>	<b>237</b>
